Know Your Finances

This engaging series uses a humorous approach to teach about a serious topic. Students will learn about financial institutions, savings, investments, loans and interest.

2017 | 10 min | CC | AR

Borrowing Money

This programme teaches students about the pros and cons of borrowing money, different borrowing options, and factors to consider when borrowing. Students will learn about loans and credit cards, interest rates, and credit ratings. The programme discusses the positives and negatives of different loan types, as well as the value of Parmesan cheese and the need to wear shoes instead of pizza boxes.

Introducing the Finance Industry

This programme teaches students about different types of financial institutions and the services they offer. It explains the concepts of interest earned, interest charged, and how financial institutions make a profit. The programme explores the move to a more cashless society...and the need to invest your money wisely!

Mid Secondary

Savings and Investing

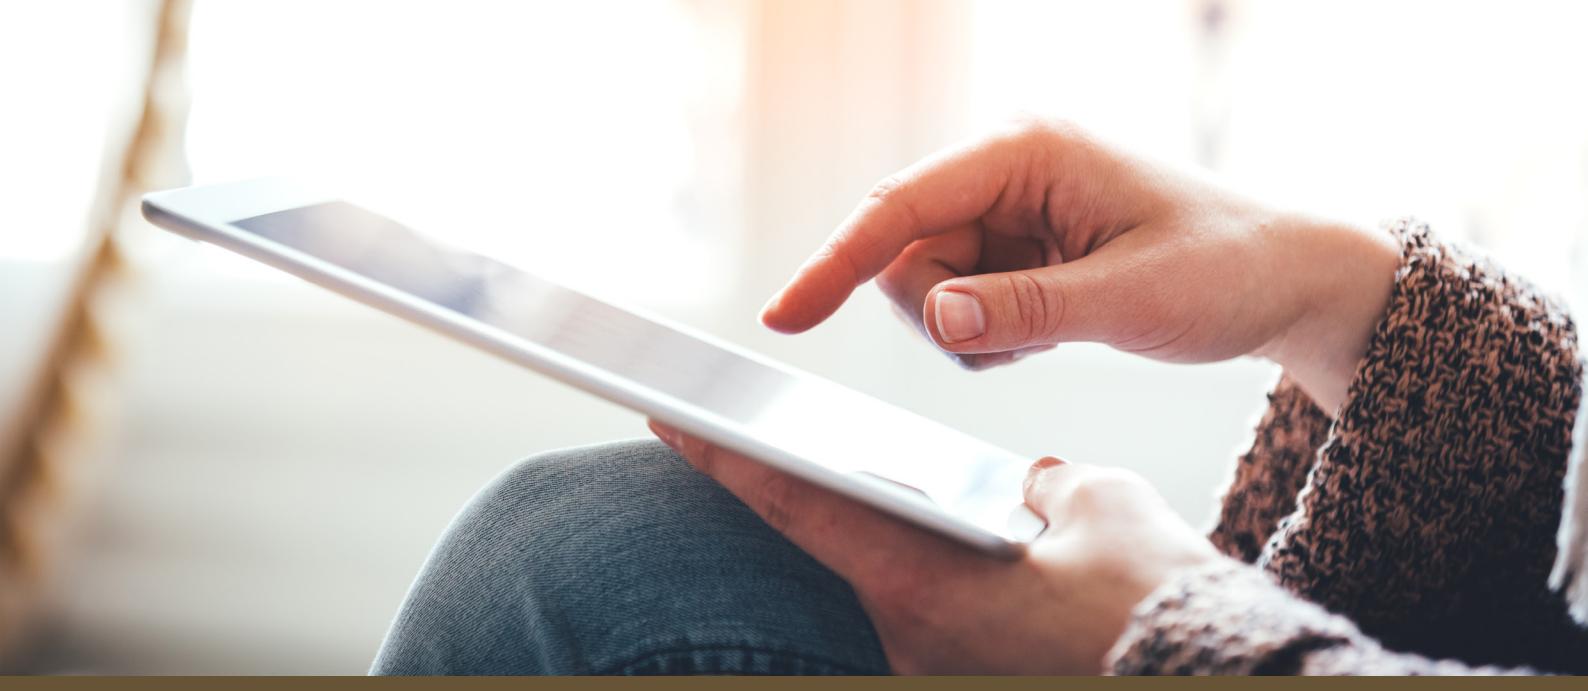

This programme teaches students about the definitions of, and need for, savings and investments. Reasons why people save are explored, as well as the concept of creating a savings plan. The programme explains a number of different investment options, outlining the positives and negatives of each. Students will learn about the need to plan for the future...and not to waste money on frivolous (and frightening) collections.

ICT Basics

This series teaches students about important ICT basics involving communication, networks and data storage. These visually stimulating programmes are sure to engage your learners through their use of interesting graphics and animation.

Codes and Canines: Data Transmission and Storage

This creative programme takes students on a journey as Kat teaches them about data storage and communication. Powerful visual diagrams and animations are used throughout, in order to aid students' understanding of the concepts that are explored. Students will learn about the role of binary in communicating and storing data, the standard units for file sizes, ASCII, and the differences between a variety of audio and visual file types.

Let's Build the Internet: Networking

In this animated programme, our character Sam shows students the basics of networking and data transmission. Engaging graphics are used to explain concepts clearly and visually, depicting how data is transmitted via cables and fibre optics, and why switches and routers are important. Students will also learn about binary, LANs, WANs and why protocols are used.

Don't Be a Dummy

In this series, a dark and mysterious character, The Collector, sends his mannequins into the real world to face dire safety consequences. Fran, Francis, Sam and Samantha try to help, but fortunately...I mean – unfortunately...the mannequins seem destined to meet their demise.

Be Aware of Your Surroundings

This is a suspenseful tale about the consequences we face if we are not aware of our surroundings. Follow Billy's journey to school as his friends try to help, but Billy ultimately does not listen. Through Billy's misadventures, students will learn about the need to watch where you are walking, listen to the environment around you, follow road safety rules and keep track of your belongings.

Be Safe at Home

In this ‘terrifying’ tale, Billie mysteriously turns up at Sam and Samantha’s house in the middle of a thunderstorm. Ignoring all the house rules their parents had put in place, Billie wreaks havoc before suddenly vanishing after answering a knock on the front door - disappearing just as mysteriously as she had arrived.

Look after Your Belongings

Follow Billie’s tale of woe as she disregards the good advice of friends Sam and Samantha, who attempt in vain to teach her about taking responsibility for your own belongings. Students will learn about keeping valuable items safe and out of sight, and protecting personal information on their phones. Will Billie survive? Only time will tell...

Safe Travels

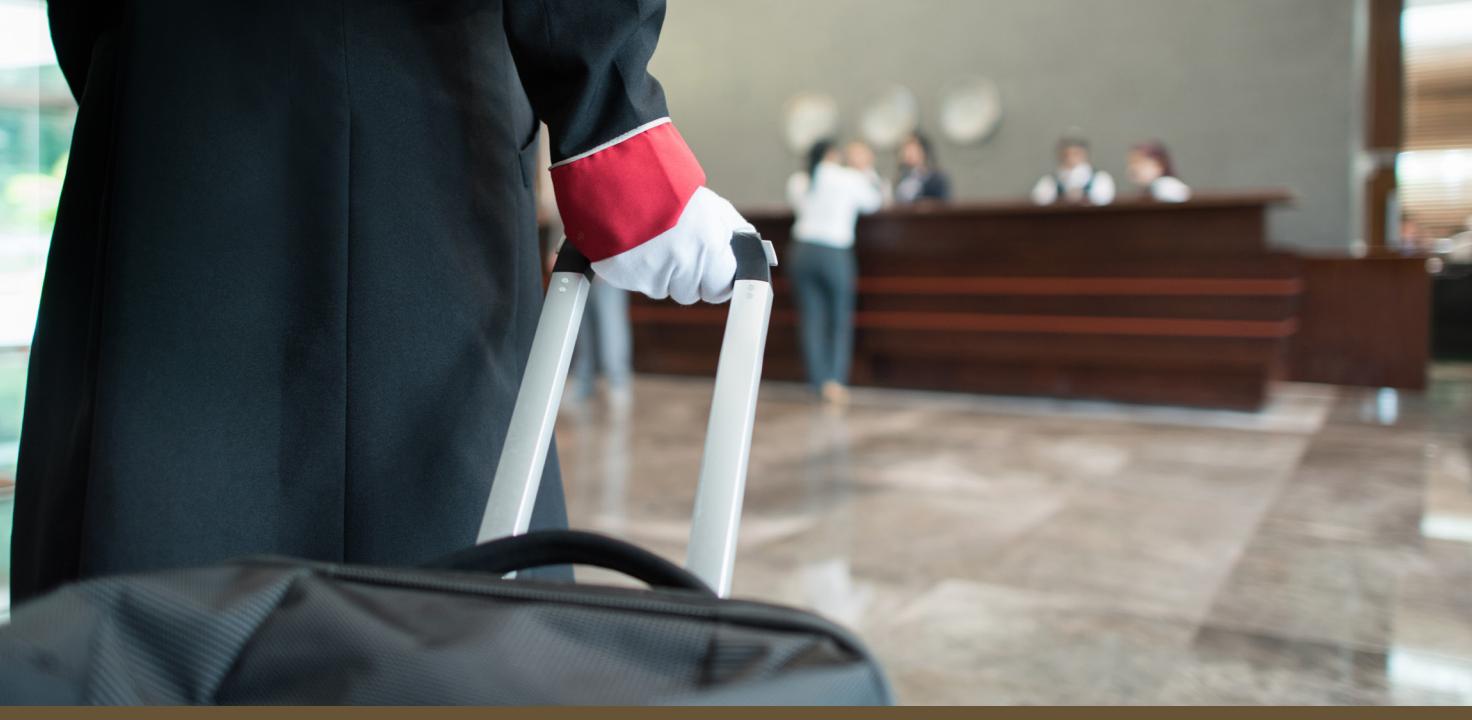

This is a dangerous description of the perils faced when we do not make wise decisions when traveling. Take the ominous short cut or the safe way home? Approach a stranger or stay safe with friends? Keep yourself safe or prioritise your belongings? Fran and Francis make all these decisions and more...and with each step, Billy seems to walk ever closer to his doom.

Working in a Travel and Tourism Team

Travel and tourism is an industry where teamwork is universal. Just about any employment role involves other people you rely on to be able to do your job. Every team is unique and there are many factors contributing to how effectively its members work together. This programme explores some of the critically important ones, including an introductory overview of travel and tourism teams, types of teams, dealing with conflict and developing effective teams.
