Economics and Business

Stills from our new series

Know Your Finances

This engaging series uses a humorous approach to teach about a serious topic. Students will learn about financial institutions, savings, investments, loans and interest.

2017 | 10 min | CC | AR

Borrowing Money

This programme teaches students about the pros and cons of borrowing money, different borrowing options, and factors to consider when borrowing. Students will learn about loans and credit cards, interest rates, and credit ratings. The programme discusses the positives and negatives of different loan types, as well as the value of Parmesan cheese and the need to wear shoes instead of pizza boxes.

Savings and Investing

This programme teaches students about the definitions of, and need for, savings and investments. Reasons why people save are explored, as well as the concept of creating a savings plan. The programme explains a number of different investment options, outlining the positives and negatives of each. Students will learn about the need to plan for the future...and not to waste money on frivolous (and frightening) collections.

Investigating the Past: Pompeii and Herculaneum

Mount Vesuvius erupted in 79 AD and the cities of Pompeii and Herculaneum were completely buried. For 1600 years, their secrets were lost in time. New research and technology has uncovered a society frozen in time. However ethical issues surrounding the display of human remains, and how best to conserve and reconstruct the sites, pose challenges which continue today.

Julius Caesar

Julius Caesar had possibly more impact on his time than any other Roman. Politically, Caesar took control of Rome's destiny, guiding it to become an empire that would rule the ancient world for another 500 years. This video looks at Roman society, politics, and the civil wars during the first century BCE. Caesar's family background, early life, marriages, ambition, military, and political careers are studied.

ICT

Stills from our new series

ICT Basics

This series teaches students about important ICT basics involving communication, networks and data storage. These visually stimulating programmes are sure to engage your learners through their use of interesting graphics and animation.

Codes and Canines: Data Transmission and Storage

This creative programme takes students on a journey as Kat teaches them about data storage and communication. Powerful visual diagrams and animations are used throughout, in order to aid students' understanding of the concepts that are explored. Students will learn about the role of binary in communicating and storing data, the standard units for file sizes, ASCII, and the differences between a variety of audio and visual file types.

Don't Be a Dummy

In this series, a dark and mysterious character, The Collector, sends his mannequins into the real world to face dire safety consequences. Fran, Francis, Sam and Samantha try to help, but fortunately...I mean – unfortunately...the mannequins seem destined to meet their demise.

Be Aware of Your Surroundings

This is a suspenseful tale about the consequences we face if we are not aware of our surroundings. Follow Billy's journey to school as his friends try to help, but Billy ultimately does not listen. Through Billy's misadventures, students will learn about the need to watch where you are walking, listen to the environment around you, follow road safety rules and keep track of your belongings.

Be Safe at Home

In this 'terrifying' tale, Billie mysteriously turns up at Sam and Samantha's house in the middle of a thunderstorm. Ignoring all the house rules their parents had put in place, Billie wreaks havoc before suddenly vanishing after answering a knock on the front door - disappearing just as mysteriously as she had arrived.

Essential Physical Fitness: What Every Teen Needs to Know

The benefits of physical fitness - including better overall health, protection from illness, improved mental health, and a longer lifespan - are too important for teens to ignore. This fast-paced programme introduces teens to the core elements of fitness: cardiorespiratory endurance, muscle strength and endurance, flexibility, and body composition. Not only will students learn how to get fit, they'll understand that fitness can - and should - be fun.

Child Development Theorists

The changes that happen to humans in the first two decades of life are astonishing - from being helpless newborns to independent adults. The study of that journey - with its physical, intellectual, social, and emotional changes - is called child development theory. Theories in child development have changed the way that parents raise their children and the way teachers teach those children. 'Child Development Theorists' is an entertaining and enlightening view of fifteen major child development theorists.

Working in a Travel and Tourism Team

Travel and tourism is an industry where teamwork is universal. Just about any employment role involves other people you rely on to be able to do your job. Every team is unique and there are many factors contributing to how effectively its members work together. This programme explores some of the critically important ones, including an introductory overview of travel and tourism teams, types of teams, dealing with conflict and developing effective teams.
